Financial Tear Sheet

Founded in 1949, Medtronic has grown to become the world's largest independent medical technology company. At the core of all we do is our Mission: to alleviate pain, restore health and extend life. It provides a clear path for all employees as we work together to take Medtronic to the next level.

Medtronic was first incorporated April 23, 1957 and became a public company as the result of a convertible debenture offering. The first shares were issued under these debentures on December 17, 1959 to our company founders, Earl Bakken and Palmer Hermundslie. Medtronic shares were traded Over-the-Counter (OTC) until we were listed on the NASDAQ in 1964. Medtronic began trading on the New York Stock Exchange on November 21, 1977 and continues to be traded on the NYSE today under the ticker symbol MDT.
